

USMAN IBRAHIM

Cybersecurity Student | SOC Analyst | Blue Team Specialist

Islamabad, Pakistan | 0334-2226620 | i242038@isb.nu.edu.pk | [linkedin.com/in/usman-ibrahim](https://www.linkedin.com/in/usman-ibrahim) | github.com/UsmanPrime | usmanprime-portfolio.vercel.app

PROFESSIONAL SUMMARY

SOC Analyst and Blue Team practitioner with hands-on experience in SOC operations, SIEM-based security monitoring, Digital Forensics and Incident Response (DFIR), and proactive threat detection. Proven track record triaging 30+ daily alerts using Splunk and Wazuh, correlating events and threat intelligence feeds against MITRE ATT&CK TTPs, and analysing endpoint telemetry to identify indicators of compromise (IOCs). Experienced CTF challenge author with expertise in memory forensics, digital forensics, network traffic analysis, and threat hunting. Seeking a SOC Analyst or Defensive Security Internship to apply incident response and blue team expertise in a professional security operations environment.

CORE COMPETENCIES

SOC Operations | Threat Detection | Incident Response | MITRE ATT&CK | SIEM Administration | Digital Forensics | IOC Analysis | Threat Hunting | Log Management | Memory Forensics | Security Monitoring | Vulnerability Assessment

TECHNICAL SKILLS

Security Operations: SOC Operations, Alert Triage, Incident Response, DFIR, Threat Hunting, IOC Analysis, Vulnerability Assessment, Playbook Execution, SOC Tier 1 / Tier 2

SIEM and Security Tools: Splunk, Wazuh, SIEM Administration, Elastic Stack (ELK), Wireshark, Volatility 3, Autopsy, Belkasoft, Linux, Docker, Git

Digital Forensics: Memory Forensics, Windows Forensics, Network Traffic Analysis (PCAP), Log Analysis, File-Embedded Forensics, Endpoint Telemetry, OSINT

Network Security: TCP/IP, OSPF, EIGRP, VLSM, NAT, Extended ACLs, Firewall Rules, Cisco Packet Tracer, DHCP, DNS

Frameworks and Standards: MITRE ATT&CK, ISO/IEC 27001, NIST Cybersecurity Framework

Programming Languages: Python, Bash, C++, x86 Assembly (MASM32), JavaScript, TypeScript

Web and Dev Tools: React 18, Node.js, Express.js, MongoDB, Tailwind CSS, Vercel, GitHub

EXPERIENCE

SOC Analyst Intern

Tech Hierarchy | March 2026

- Triaged and investigated 30+ daily security alerts in Wazuh and Splunk SIEM administration consoles, correlating IOCs against threat intelligence feeds and MITRE ATT&CK TTPs to classify indicators of compromise, reduce false-positive rates by 20%, and escalate confirmed security incidents per established SOC runbooks.
- Conducted in-depth analysis of 500+ endpoint telemetry records and network logs per week through structured log management and security monitoring workflows to detect IOCs; documented findings in structured security incident reports for Tier 2 handoff, improving mean documentation quality by 30%.
- Constructed a personal SOC lab using Wazuh and ELK Stack to simulate 5+ threat actor attack scenarios (lateral movement, privilege escalation, credential dumping) with Endpoint Detection and Response (EDR) telemetry, cutting mean-time-to-detect (MTTD) by 30% through refined detection rules.

Challenge Author - NASCON 2026 Forensics Arena

FAST NUCES Islamabad | February 2026 - Present

- Authored a hard-category memory forensics challenge simulating a fileless malware credential dumping attack (MITRE T1003.001) requiring Volatility 3 analysis to perform memory artifact analysis, extract NTLM hashes, and recover plaintext credentials — completed by fewer than 10% of competitors.

Challenge Author and Organizer - RDX National CTF

June 2025 - July 2025

- Authored and deployed 6 challenges covering log correlation, PCAP analysis, network forensics, artifact investigation, and file-embedded forensics for 100+ participants; challenges assessed blue-team DFIR skills under time-constrained conditions.

Business Development Intern

Intellema | May 2026 - Present

- Collaborated with a cross-functional team of 8+ professionals to identify opportunities for advanced AI solutions including RAG, LLM, Deep Learning, Generative AI, and Voice AI.
- Contributed to proposal preparation and AI-driven project initiatives, demonstrating understanding of enterprise AI integration approaches across industries.

- Evaluated enterprise AI security compliance requirements and data governance considerations for client proposals, including LLM attack surface awareness and prompt injection risk assessment.

EDUCATION

Bachelor of Science in Cyber Security

FAST National University of Computer and Emerging Sciences, Islamabad | August 2024 - June 2028

- Relevant Coursework: Software Engineering, Cybersecurity-I, Computer Networks
- **Cyber Space Legion** | *University Cybersecurity Society*
 - Technical Team Member: CTF participation, forensics challenge authoring, and blue-team skills workshops for junior members.
 - Head of Finance (2025 - Present): Led finance team for flagship events, managed sponsor relations, and oversaw budgeting for all society activities.

CERTIFICATIONS

- Certified Defensive Security Analyst (CDSA) | Hack The Box (In Progress)
- Security Operations Center (SOC) | Cisco
- Network Security | Cisco
- ISO/IEC 27001:2022 Information Security Associate | Skill Front
- Computer Networks and Network Security | IBM
- Windows Forensics with Belkasoft | Belkasoft (6 CPE Credits)
- Advanced Digital Forensics Techniques | Training Course

PROJECTS

NextGen Residency - Smart Housing Society Platform | *MongoDB, Express.js, React 18, Node.js* | Jan 2026 - May 2026

- Engineered a hardened backend API with Helmet.js security headers, CSRF protection, rate limiting with progressive delays, and NoSQL injection prevention via input sanitization.
- Integrated Two-Factor Authentication (TOTP) with backup codes, Google reCAPTCHA v2, and bcrypt password hashing to enforce multi-layered authentication security.
- Implemented audit logging, field-level encryption, and security event monitoring for compliance-grade data protection and incident traceability.
- Designed role-based access control (RBAC) with JWT authentication using refresh tokens and token fingerprinting across 3 user portals.

Enterprise Multi-Area Network Architecture | *Cisco Packet Tracer, OSPF, EIGRP, RIPv2* | 2026

- Engineered a complex enterprise-grade multi-area network topology supporting 11 LANs and 22 WAN links across 19 routers and 11 switches.
- Secured network traffic by deploying Static NAT for public IP translation and implementing Extended Access Control Lists (ACLs) to enforce host and subnet-level security policies.
- Implemented advanced routing protocols (OSPF, EIGRP, RIPv2) and configured mutual route redistribution across 3 border routers for seamless multi-domain connectivity.

SecureShop | *C++, File I/O, Secure Coding* | 2024

- Constructed a secure shopping platform with multi-factor authentication and input-sanitization routines blocking injection-style attacks; protected 50+ simulated user transaction records against unauthorized access.

Dizzy Walk - Maze Adventure Game | *x86 Assembly (MASM32), Win32 API, GDI* | Spring 2026

- Developed a real-time graphical application in x86 Assembly (2,700+ lines), demonstrating low-level memory management, stack frame discipline, and systems-level programming expertise.

Xonix Game - Professional Edition | *C++11, SFML, CMake, OOP* | 2024

- Engineered a multiplayer arcade game with Hash Table-based user authentication (O(1) lookup), secure file-based persistence, and 10+ custom data structures.

Cybersecurity Portfolio | *React, TypeScript, Tailwind CSS* | 2025

- Architected and launched a cybersecurity-themed portfolio website achieving a 95+ Lighthouse performance score with full mobile responsiveness.

OSIM - Organizational Simulation System | *C++, OOP* | 2024

- Architected an enterprise-style simulation with 12+ class hierarchies demonstrating SOLID principles; persisted 1,000+ records with zero data loss.

ACHIEVEMENTS AND COMPETITIONS

3rd Place - SudoFuzzers CTF (Forensics and OSINT) | 2025

- Ranked 3rd out of 50+ teams solving digital forensics and OSINT challenges under a 4-hour time constraint, placing in the top 6% of all participants.

7th Place - CyberFest 2025 (National CTF) | 2025

- Secured 7th place among 100+ competing teams, finishing in the top 7% across forensics, OSINT, and network analysis categories.
