Career Objective

BS Cyber Security student at FAST NUCES Islamabad focused on **SOC operations, DFIR, and blue-team security**. Trained in **Windows Event Logs, Sysmon, SIEM, Wireshark, and incident investigation** through hands-on labs, CTFs, and enterprise-style simulations. Experienced in **alert triage, threat detection, log correlation, and forensic analysis** with strong exposure to real-world attack scenarios.

Education

FAST-NUCES, Islamabad

Bachelor of Science in Cyber Security | Expected Graduation: 2028

CERTIFICATIONS & PROFESSIONAL TRAINING

Defensive Security & SOC

- Security Operations Center (SOC) — Cisco, Jul 2025
- Network Security — Cisco, Oct 2025
- Certified Defensive Security Analyst (CDSA) — Hack The Box (*In Progress*)

Digital Forensics

- Advanced Digital Forensics Techniques — Jan 2025
- Windows Forensics with Belkasoft — Feb 2025 (6 CPE Credits)

Governance & Security

- ISO/IEC 27001:2022 Information Security Associate — Dec 2025

Networking & Foundations

- Computer Networks & Network Security — IBM, Aug 2025
- Introduction to Cybersecurity Careers — IBM, Jul 2025

CORE COMPETENCIES

SOC & Blue Team

- Threat Monitoring, Alert Triage, Incident Response
- Security Event Analysis, Escalation & Documentation
- Threat Intelligence & IOC Analysis

SIEM & Log Analysis

- Windows Event Logs, Sysmon
- Splunk, Elastic, Log Correlation
- Querying, Dashboards, Alert Tuning

Digital Forensics & DFIR

- Windows Forensics (Belkasoft)
- Memory, Logs, Network Captures
- Timeline Reconstruction & Evidence Correlation

Networking & Systems

- TCP/IP, Network Protocols
- Linux Administration
- Virtual Machines, Docker

Programming & Scripting

- Python, Bash
- C++, JavaScript
- HTML, CSS

TECHNICAL PROJECTS

Smart Housing Society (MERN Stack)

Role-based system for residents, admins, and vendors with complaint tracking and facility booking

OSIM – Organizational Simulation (C++)

Enterprise-style management system demonstrating OOP, file handling, and data modeling

SecureShop (C++)

Secure shopping platform with authentication, product management, and input validation

Xonix Game (C++)

Game engine using data structures, collision detection, and game logic

Cybersecurity Portfolio (React + TypeScript)

Modern cyber-themed portfolio with project showcase and professional branding

PRACTICAL SECURITY EXPERIENCE

Hack The Box – Sherlocks & CDSA Labs

Blue-Team & DFIR Trainee

- Investigated real-world attack simulations using event logs, memory dumps, and PCAPs
- Performed timeline reconstruction, attacker tracking, and artifact analysis
- Practiced incident response workflows and forensic methodology

TryHackMe – SOC Level 1

SOC Analyst Training

- Monitored a simulated enterprise network under attack
- Analyzed SIEM alerts, logs, and network traffic
- Performed alert triage, incident classification, and reporting

University Network Security Capstone

- Monitored lab network during controlled penetration testing
- Identified traffic anomalies, unauthorized access, and attack patterns
- Produced incident documentation and findings reports

CTF & COMPETITIVE SECURITY

- 3rd Place – SudoFuzzers CTF (Forensics & OSINT)
- 7th Place – CyberFest 2025
- Specialized in forensics, log analysis, OSINT, and incident scenarios under time pressure

CTF ORGANIZATION & LEADERSHIP

RDX National CTF – Challenge Author & Finance Manager

- Designed forensics, log analysis, network security, and PDF-embedded malware challenges
- Built and tested challenge infrastructure
- Managed event finances and coordinated with organizers

Languages

- English (Intermediate) | Urdu (Fluent)
